

Global Filtration Technology

An extensive range of competitively priced Parker quality replacement filter elements. Par-Fit interchange elements allow the users to acquire all their replacement elements from one quality source regardless of the original equipment manufacturer.

Par-Fit competitive interchange elements must conform to all the same rigorous tests as the standard Parker replacement elements. The elements meet or exceed all specifications for the following tests:

IS02941	Element Collapse/Burst Resistance
IS02942	Fabrication Integrity
IS02943	Material Compatibility
IS03724	Flow Fatigue Resistance
IS04572	Multipass Test

In addition to price and quality, the range of interchange elements available is key to a successful program for the user. Parker has worked diligently over the years to develop a range of elements that will meet this challenge.
